Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- An area of low pressure developing off the Baja CA coast will tap into significant tropical moisture, spreading it northward and into Arizona and southeast California. Moisture will begin increasing today, with the bulk of the moisture arriving Monday and continuing through the day on Tuesday. Scattered to numerous showers, some with heavy rain, will develop area-wide Monday and continue thru Tuesday as the low off Baja ejects inland to the northeast.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

High pressure aloft will maintain warm and dry weather across northwest California through the remainder of the weekend. An approaching trough will bring cooling temperatures next week.

Medford Weather:

A long wave ridge over the area will flatten out to zonal flow this morning as short waves ride over the top of it. The storm track will remain north of the area but the region will catch the southern end of weak cold fronts which will move onshore today and Monday. The first front will be dry and the second may bring some light precipitation to the north coast and Umpqua Basin. These fronts will bring some clouds to the coast today and more widespread clouds Monday. It will also get breezy east of the Cascades Monday. The front today will come too late to cool off the inland areas, and today will be the hottest day as the thermal trough moves inland. Flow aloft will become southwesterly Tuesday and gradually increase into Thursday as an upper trough digs offshore. Heights will change little during this interval and the storm track will remain to the north of the area. The inland cooling trend will continue with inland highs dropping 5 to 10 degrees from Monday to Wednesday.

Reno Weather:

High pressure will keep dry conditions and above average temperatures across the region through Monday. Breezy afternoon winds will develop on Monday and Tuesday afternoons ahead of a weak cold front. Cooler temperatures with more breezy conditions possible later in the week as the pattern become more progressive.

San Francisco Weather:

Hot and dry conditions are forecast for Sunday. Slight cooling will occur near the coast on Monday, but inland areas will remain very warm. Significantly cooler temperatures are anticipated in all areas on Tuesday with the return of onshore flow. Temperatures are then expected to remain near normal for the remainder of the week.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Dry weather continues with daytime temperatures well above normal through Monday. Temperatures will peak today with a slow cooling trend expected and near normal temperatures again for the second half of the week.

Hanford Weather:

Temperatures will warm to well above normal over the weekend. Dry weather is expected across the central California interior through Monday. Next week tropical moisture will move northward into the region bringing a threat of thunderstorms to parts of the area.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Temperatures will be above normal today but they will return to near normal on Monday. Clouds will start to increase later today and by Monday skies will be mostly cloudy. A chance of showers or thunderstorms will develop over Los Angeles County Monday and persist into Tuesday. Fair weather is forecast from mid week on.

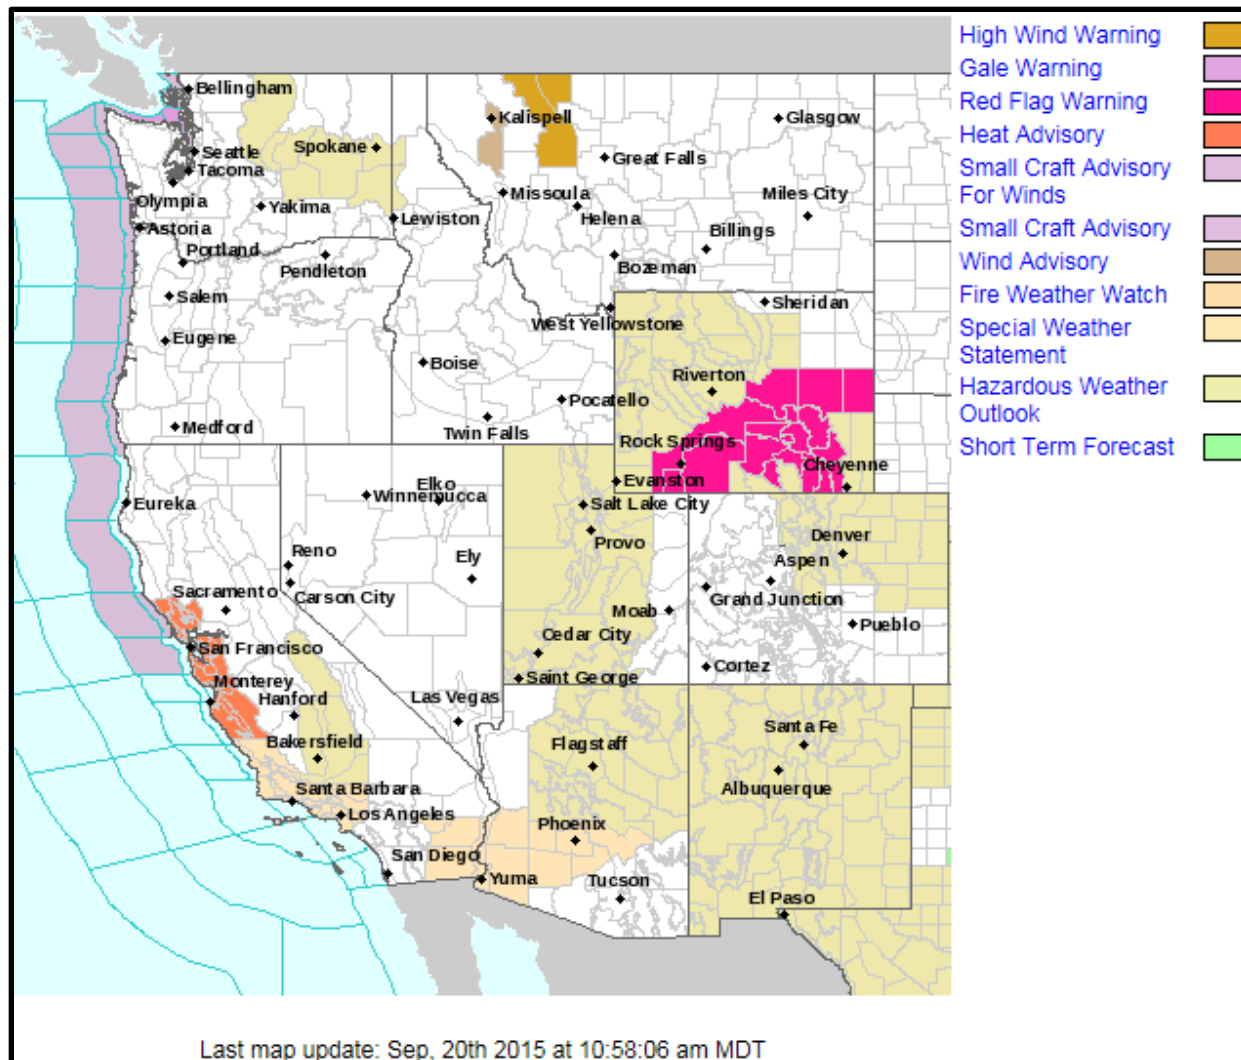

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

Expect sunny and hot today, then warm and humid Monday with widespread showers and thunderstorms. On Tuesday a trough of low pressure moving across southern California will continue the threat for scattered showers and thunderstorms. Dry and very warm for the balance of the week as high pressure aloft builds over the southwest.

Southeast California Weather:

Unseasonably warm conditions are expected today with clear skies and light winds. Cooler temperatures will follow through mid week as tropical moisture moves in from the south and brings showers and thunderstorms to portions of the area. Slightly drier air and warmer temperatures are expected to begin the fall season.
